a **Use the same 28-day comparison window**

b **The financial difference is computable**

$$\Delta Y = 100{,}000 - 10{,}000 = 90{,}000 \text{ CNY}$$

Net supplements; ordinary earnings held equal; 21 more overtime days

c **The health comparison requires an additional evidential step**

Exposure and baseline state → **Recovery and later outcomes** → **Appraisal**
