a **Long working hours**

7 cohorts • 162,644 participants

RR 1.35

95% CI 1.13–1.61

Stroke incidence; log ratio scale
≥55 versus 35–40 hours/week

b **Diet composition**

Randomized crossover • 20 adults

+508 kcal/day

±1 SE (106 kcal/day)

Energy intake difference
Ultra-processed versus unprocessed

c **Sleep extension**

81 randomized • 80 in analysis set

−270 kcal/day

95% CI −393 to −147

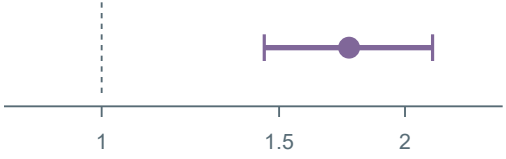

Energy intake change versus control
Short-sleeping adults with overweight

d **AI medical information**

Randomized study • 1,298 people

OR 1.76

95% CI 1.45–2.13

Relevant-condition identification
Control versus pooled AI; log ratio scale
