## a Account for all work time

| T0 | T1 | S = T0 − T1 | ΔW = −S + A + B |
|---|---|---|---|
| Without AI | Prompt + check + rework | Task saving | Total work change |

## b The same task saving can lead to different days

Hypothetical 24-hour budgets; 4 hours saved; other work-time change B = 0

Non-work time still needs to be allocated among sleep, care, activity, social contact and leisure.
