a Account for all work time

T0	T1	S = T0 − T1	ΔW = −S + A + B
Without AI	Prompt + check + rework	Task saving	Total work change

b The same task saving can lead to different days

Hypothetical 24-hour budgets; 4 hours saved; other work-time change B = 0

Non-work time still needs to be allocated among sleep, care, activity, social contact and leisure.
